MEMORANDUM FOR: Chief, Technical Services Division
Director of Research and Development

SUBJECT : Security Aids Equipment Research and Development

REFERENCE : Memorandum dated 6 Oct. 67 from O/PPB to DD/S&T; subject: TSD's Requirement for \$65 000 of Additional Funds for Security Aids Equipment Research and Development

My enthusiasm for coordinating the R&D program for the Agency primarily results from the opportunity it provides for the resolution of problems by those most qualified to do so. Since O/PPB cannot identify reprogrammable funds in other program categories, will you please examine the various projects planned by your organizations in the Security program element and determine whether and how the projects described in reference should be funded by reprogramming within the Security Element? If you feel reprogramming from another element is desirable, please identify the specific changes you recommend. Because the funds involved are not large, your recommendations should pertain only to R&D funds now programmed for your organizations.

for **CARL E. DUCKETT**
Deputy Director for
Science and Technology

MEMORANDUM FOR: Deputy Director for Science & Technology

SUBJECT : TSD's Requirement for [] of Additional Funds for Security Aids Equipment Research and Development

25X1A

REFERENCE : Memo dated 26 Sept 67 to D/PPB from DD/P
Subject: Research and Development - Security Aids Equipment

25X1A

1. Pursuant to [] which states that the DD/S&T will participate in any significant reprogramming, I am transmitting the referent memorandum with attachment to you for comment.

2. The referent memorandum outlines the program for Research and Development on Security Aids equipment approved by the special committee for this program, and requests that an additional [] be made available to TSD for this activity. I am pleased to note that you have already made the [] required in ORD for this activity available through reprogramming within the DD/S&T.

25X1A

3. As you are aware, we have already had to do considerable reprogramming of FY 1968 funds to meet the requirements of priority programs throughout the Agency. At this early point in the fiscal year I cannot identify additional funds available for reprogramming from other Agency programs and feel that if these projects are funded, they must be funded within the Agency's R&D program. Specifically I would appreciate your views on:

a. Are these projects of sufficient priority to warrant reprogramming?

b. If so, from what areas of the Agency's R&D program should funds be reprogrammed?
